PART I

ITEM 1. BUSINESS

HISTORY

The Farmers & Merchants State Bank is a community bank, as it has been since 1897. When Archbold's population was less than 900, there were six local businessmen foresighted enough in their thinking and views to realize the need for a bank in the village of Archbold. J. O. Swisher and Jacob Ehrat (livestock brokers) C. M. McLaughlin and A. J. Vernier (hardware merchants) and L. D. Gotshall and I. W. Gotshall (lumber merchants), were founders of the then Farmers & Merchants Bank, a private bank. The bank's first office was one room located in the Vernier Hotel building, currently occupied by the Archbold Barber Shop.

In 1907, the first new structure was built at the corner of Depot and North Defiance Streets, which is now the Subway. The bank was heralded as one of the most unusual and attractive banks in the area, featuring marble interior, brass trimmed teller cages, tile floor, leaded windows, and high vaulted ceiling. The vault featured a time controlled money safe. The building and equipment were unique to the early 1900's and adequately served the banking needs of the area for over 50 years with only minor interior alterations.

In August of 1913 the village of Archbold was hit by a disastrous fire which destroyed all the business district on the east side of N. Defiance Street from the bank at the corner of Depot Street to the Murbach medical building at the corner of Holland Street. This was a tremendous loss for a dozen or more businesses, causing many to liquidate. Young businessmen and enterprising citizens promoted a waterworks system and passed a \$16,000 bond issue to finance the project. This seemed to be the turning point for the advancement of industry and the community rallied from this eventful experience to an unusual growth.

In 1919 the founding directors elected to change from a private bank to a state chartered bank and at this time changed its name from the Farmers & Merchants Bank to The Farmers & Merchants State Bank, as required in the state charter. This has been the only name change in the bank's 98 year history. The bank's capital funds were \$53,509.84 and resources were \$571,549.28.

The bank experienced growth, especially during the post-war years and early 1950's. By 1958, the bank's resources had grown to 7 1/2 million dollars. The directors and officers realized the need for a larger building to accommodate the increase in business and services. In 1958, the bank moved to its present N. Defiance Street location greatly improving service to its customers and offering drive-up banking, electronic bookkeeping, convenient parking, and a social room for the community to use. The new building featured the latest in modern banking facilities and The Farmers & Merchants State Bank was prepared to more efficiently serve the ever growing community.

With resources of over \$23 million in 1969, The Farmers & Merchants State Bank again realized the need for additional space and inaugurated a building expansion, which nearly doubled the original structure built in 1958. The new addition, opened early in 1970, provided for an additional drive-up window, walk-up window, direct entrance from the bank parking lot to the lobby, three spacious private offices, conference room, and a large community room with a fully equipped kitchen to facilitate groups from 60 to 100.

In 1972, with total resources of over \$34 million and to continue its growth, The Farmers & Merchants State Bank established an office on N. Shoop Avenue, Wauseon. The office was opened in November 1973 and provided greater banking service to the Wauseon area. The Wauseon office provided complete banking service and a community room with kitchen facilities to accommodate 15-80 people.

In 1977-1978 additional office space was added to The Farmers & Merchants State Bank in Archbold, and an automatic teller machine, "Teller 24", was installed in the entrance lobby.

A second Wauseon office was established in the downtown area on the corner of N. Fulton and Depot streets in August of 1978. It is a very convenient location for shoppers and businesses. The Downtown office also provides 24 hour banking with "Teller 24".

During April of 1980 a second office was opened in Archbold, located in the Luginbill Addition near Woodland Oaks. The Woodland office is a convenient branch offering full banking services to those Archbold residents in the outlying area.

With resources of \$83 million the decision was made to open full service offices in Stryker and West Unity in 1981.

During that year, new computerized proof equipment was added to capture the required data in today's complex and competitive banking environment. A new division was added to the Operations Department in the creation of the Central Information File Department. Plus, two new branches were opened, the Delta office in June and the all new Bryan E. High office in December.

In 1985 the conversion of the former bank, The Farmers & Merchants State Bank, into a holding company structure was performed to provide greater flexibility for expanding the bank's business into activities closely related to banking, as well as, placing the bank in a position to react in a timely and effective manner to the many complex changes affecting the banking industry. On April 22, 1985, a new Ohio chartered bank was formed and incorporated as the FMSB Bank following the formation of a holding company, The Farmers & Merchants Bancorp, Inc., which was incorporated as a bank holding company under the laws of the State of Ohio on February 25, 1985. A triangular merger was then effected whereby the former bank, The Farmers & Merchants State Bank, was merged with and into the new bank, the FMSB Bank with each outstanding share of common stock of the former bank being converted by operation of law upon consummation of the merger into two shares of common stock of Farmers & Merchants Bancorp, Inc. Upon the merger becoming effective July 31, 1985, 260,000 shares of Farmers & Merchants Bancorp, Inc., no par value common stock were issued. The resulting new bank in the merger is the FMSB Bank; however, its name was changed concurrently with the merger to The Farmers & Merchants State Bank. Upon consummation of the merger, the stockholders of Farmers & Merchants Bancorp, Inc. received the same percentage of ownership in the holding company as their percentage of ownership of the former bank. The former bank then ceased to exist. All of the 260,000 issued and outstanding shares of stock of the new bank, The Farmers & Merchants State Bank, were held by the bank holding company, Farmers & Merchants Bancorp, Inc.

With the success The Farmers & Merchants State Bank was experiencing in Stryker, West Unity and Bryan and the prospect of continued growth in Williams County, it was decided to open another office in Bryan and one in Montpelier. In May of 1992, the doors were opened at a second office in Bryan located on S. Main Street; and in July of 1992 the bank was pleased to be able to offer their financial services to the community of Montpelier. The Bryan S. Main Street banking center has three drive-up lanes and a drive-up ATM. Also during 1992, the West Unity Office was expanded and an additional drive-up lane was added at the Delta Office.

Also during 1992, an accidental death and disability insurance company was formed, Farmers & Merchants Life Insurance Company. The company was organized under the laws of the State of Arizona with 100% of the 100,000 issued and outstanding shares of common stock owned by Farmers & Merchants Bancorp, Inc.

The growth of The Farmers & Merchants State Bank continued to be very favorable in 1993 with assets in excess of \$370 million, but with the tremendous growth that was occurring, the bank was feeling growing pains brought on by cramped quarters. There were no longer community rooms in either the Main Office or the Wauseon Shoop Office. All available space at the Main Office had been used, by turning closets and storage space into offices and many of the offices that were designed for one officer were housing two officers. The Marketing and Personnel departments had been moved to the Wauseon Shoop Office basement, the former community room. The time had come for the addition of more office space at the Main Office. The former Christy Building, located on the north side of the Main Office, was demolished during the fall of 1993 to clear the way for the building expansion to begin.

Because of the ever-increasing flow of customers at the Wauseon N. Shoop Office, a decision was made to install a drive-up ATM. That ATM was installed in December, 1993. An ATM was also installed at Sauder Woodworking Co. to better serve the Sauder employees, who work various shifts, making it inconvenient for them to bank during regular banking hours.

1994 was a very special year for The Farmers & Merchants State Bank. Earnings were very strong, asset quality remained outstanding, and the bank expanded its presence within its market area. The goals for 1994 were exceeded, with a new high in assets of \$406,186,216. With a growing interest to expand the bank's market area and branch into Henry County, an application was submitted for a Napoleon office. Once the application was approved, the bank wasted no time in getting the building constructed. The full service Napoleon Office, with a drive-up ATM, was conveniently located on St. Rt. 108 on the north edge of Napoleon making it easily accessible for the residents of Henry County.

During the time the Napoleon office was under construction, plans were completed for expansion of the Wauseon N. Shoop Office. This was the first expansion of this office since its opening in 1973, and with the basement being used for offices, more office space was greatly needed. The new addition consisted of four additional offices, a large secretarial/new accounts area, restroom, and supply room.

In October, 1994, the newly constructed expansion of the Main Office and the remodeling of the first floor of the original structure was completed. The offices were ready for occupancy in time for the annual Christmas Club Open House, November 4th and 5th. The remodeling of the offices located in the basement of the Main Office began as soon as Open House was over.

The Napoleon Office opened for business during the second week of February, 1995. On Sunday, February 12, 1995, an Open House was held at the Main Office and the new Napoleon Office.

An ATM was placed at Northwest State Community College in March, 1995, to better serve the customers from the Four County Area. In April, 1995, a drive-up ATM was installed at the Archbold Woodland Office.

During the spring of 1996, the Delta Office began an extensive remodeling and expansion project. The need was seen for more loan officer space and an ATM machine. The project was completed in October of 1996. Two more ATM locations were also secured during this year. An ATM was placed in the Community Hospital of Williams County, Bryan, and another in the Fulton County Health Center, Wauseon. The Farmers & Merchants State Bank now has twelve ATM's located throughout Fulton, Williams, and Henry Counties.

In June of 1996, Farmers & Merchants Bancorp split its stock, 5 for 1. The goal was to bring the price per share down so it would be more affordable and possibly encourage trading.

The Farmers & Merchants State Bank again hit a new growth plateau. At year end assets went over the \$500 million mark.

NATURE OF ACTIVITIES

The Farmers & Merchants State Bank through its equivalent of 205 full time employees engages in general commercial banking and savings business. Its activities include commercial and residential mortgage, consumer, and credit card lending activities. Because of the geographical locations in which the bank's branches are located, a substantial amount of the bank's loan portfolio is composed of loans made to the farming industry for such things as farm land, farm equipment, livestock and general operation loans for seed, fertilizer, feed, etc. Other types of lending activities include loans for home improvements, student loans, and loans for such items as autos, trucks, recreational vehicles, mobile homes, motorcycles, etc. The bank also is engaged in direct finance leasing and has invested in leveraged type leases, although the activity in this area has substantially decreased in recent years.

The bank also provides checking account services, as well as, savings and other time deposit services such as certificates of deposits. In addition, ATM's (automated teller machines) (Money Access Corporation) are also provided in its offices in Archbold, Wauseon, Bryan, Delta and Napoleon, Ohio. Two ATM's are also located at Sauder Woodworking Co., Inc., a major employer in Archbold. Additional locations are at Northwest State Community College, Fulton County Hospital in Wauseon, and Williams County Hospital in Bryan.

During 1987 The Farmers & Merchants State Bank began offering discount brokerage services to its customers. The offering of these services was a result of management's ongoing commitment to offer a full range of financial services to its customers.

Farmers & Merchants Life Insurance Company was established to provide needed additional services to The Farmers & Merchants State Bank's customers through the issuance of life and disability insurance policies. The lending officers of The Farmers & Merchants State Bank are the selling agents of the policies to the bank's customers. The insuring company will be USLIFE Credit Insurance Company, an Illinois Corporation, while Farmers & Merchants Life Insurance Co. will be the participating reinsurer. Farmers & Merchants Bancorp, Inc.'s original investment in Farmers & Merchants Life Insurance Co. was \$100,000. This investment represented less than 5% of Farmers & Merchants Bancorp, Inc.'s equity capital.

Farmers & Merchants Bancorp, Inc. is a bank holding company within the meaning of the Bank Holding Company Act of 1956. The bank subsidiary, The Farmers & Merchant State Bank, is in turn regulated and examined by the Ohio Division of Banks, the Federal Deposit Insurance Corporation and the Federal Reserve System. The activities of the bank subsidiary are also subject to other federal and state laws and regulations, including usury and consumer credit laws, state laws relating to fiduciaries, the Federal Truth-in-Lending Act and Regulation Z as promulgated thereunder by the Board of Governors, the Truth in Savings Act, the Bank Bribery Act, the Competitive Equality Banking Act of 1987, the Expedited Funds Availability Act, the Community Reinvestment Act, the FDICIA (Federal Deposit Insurance Corporation Insurance Act), FIRREA (Federal Institutions Reform, Recovery, and Enforcement Act of 1989), and the Bank Merger Act among others.

The commercial banking business in the geographical area in which The Farmers & Merchants State Bank operates is highly competitive. In its banking activities, it competes directly with other commercial banks and savings and loan institutions in each of its operating localities. The following is a summary by geographical area of The Farmers & Merchants State Bank principal competition:

As of December 31, 1996, management, to the best of its knowledge, is not aware of any significant loans, group of loans or segments of the loan portfolio not included above, where there are serious doubts as to the ability of the borrowers to comply with the present loan payment terms.

Interest income which would have been recorded under the original terms of the nonaccrual loans was \$624 thousand for the year 1996. Any collections of interest on nonaccrual loans are included in interest income when collected. This amounted to \$354 thousand for 1996.

Loans are placed on nonaccrual status in the event one of the following occurs: the total line of the customer is charged of to the extent of 50% or more, the loan is in past due status for more than 180 days.

The \$3.489 million of nonaccrual loans is secured at December 31, 1996.

POTENTIAL PROBLEM LOANS:

At December 31, 1996, the Bank has \$5.388 million of loans which it considers to be potential problem loans in that the borrowers are experiencing financial difficulties. These loans are subject to constant management attention and are reviewed more frequently than quarterly.

The amount of potential problem loans was considered in management's review of the loan loss reserve required at December 31, 1996.

LOAN CONCENTRATION:

In extending credit to families, businesses and governments, banks accept a measure of risk against which an allowance or reserve for possible loan losses is established by way of expense charges to earnings. This expense, used to enlarge a bank's allowance for loan losses, is determined by management based on a detailed monthly review of the risk factors affecting the loan portfolio, including general economic conditions, changes in the portfolio mix, past due loan-loss experience and the financial condition of the bank's borrowers.

At December 31, 1996, the company has loans outstanding to individuals and firms engaged in the various fields of agriculture in the amount of \$41.195 million. The ratio of this segment of loans to the total of the company's loan portfolio is not considered unusual for a bank engaged in and servicing rural communities.

No individual borrower exceeds \$1.383 million of the above amount and all such loans are performing in accordance with their contractual terms.

ITEM 2. PROPERTIES

The principal office of Farmers & Merchants Bancorp, Inc. is located in facilities owned by The Farmers & Merchants State Bank at 307-11 North Defiance Street, Archbold, Ohio 43502.

The Farmers & Merchants State Bank operates from and utilizes the entire facilities at 307-11 North Defiance Street. In addition, the bank owns the property from 200 to 208 Ditto Street, Archbold, Ohio, which it uses for Bank parking and a community mini-park area. The Bank owns real estate at two locations, 207 Ditto Street and 209 Ditto Street in Archbold, Ohio upon which the bank built a commercial building to be used for storage, and a parking lot for company vehicles and employee parking. The Bank owns a commercial building at 313 North Defiance Street, which is located adjacent to the Bank's principal office. Demolition of the existing building at this location took place in late 1993, and construction began on a 15,237 square foot addition which was substantially completed by the end of 1994 with final completion taking place in the spring of 1995. In 1993 the Bank also purchased real estate across from the main facilities to provide for possible parking expansion.

In 1989 the Bank purchased additional real estate in Bryan, Ohio, and has established another branch operation in Bryan. The Bank, in 1988, purchased real estate immediately adjacent to its branch bank premises in Delta, Ohio for expansion of parking facilities. In 1990 the Bank purchased real estate in Delta, Ohio for additional parking to serve its branch office. The Bank constructed in 1994 a 1,540 square foot addition to the branch in Wauseon, Ohio. The Bank obtained permission to open a branch in Napoleon, Ohio. Facilities were completed in the fall of 1994.

The Bank also owns real estate consisting of land and buildings housing each of its full service branch bank operations, except for the Montpelier, Ohio facilities which are leased. The following is a compendium of the various branch locations:

Branch -----	Location -----
Archbold, Ohio	1313 South Defiance Street

ITEM 6. SELECTED FINANCIAL DATA

Selected financial data is presented on page 37 of the Annual Report to shareholders for the year ended December 31, 1996 and are incorporated herein by reference.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The purpose of this discussion is to focus on information concerning the company's financial condition and results of operations which is not otherwise apparent from the consolidated financial statements included in the annual report. Reference should be made to those statements and the selected financial data presented elsewhere in the report for an understanding of the following discussion and analysis.

FINANCIAL CONDITION

The company's bank subsidiary continues to follow the strategy of acquiring assets for investment purposes and retaining its own loan production, attempting to achieve reasonable spreads through matching such assets with one of a number of funding sources available.

The Farmers & Merchants State Bank functions as a financial intermediary, and as such, its financial condition should be examined in terms of trends in its sources and uses of funds. The following comparison of daily average balances indicates how the bank has managed its sources and uses of funds (in thousands):

Total assets for Farmers & Merchants Bancorp, Inc. have increased from \$406.1 million in 1994 to \$464 million in 1995 and to \$501.4 million in 1996, a 14.28% and 8% increase, respectively. The increase in assets of \$37 million is primarily the result of growth in the loan portfolio which increased \$29 million, \$21.7 million in real estate mortgages and \$8.8 million in commercial loans. These increases can be attributed to favorable interest rates, as well as, an aggressive, but controlled and managed loan policy.

Investment securities increased \$17 million from \$84.7 million for 1995 to \$101.7 million for 1996. Two categories of investment securities accounted most of this growth, \$6.7 million in U.S. Government and agency securities and \$8.3 million in corporate securities. The security portfolio also benefited from a \$1 million unrealized increase in the market value of the portfolio.

The above increases in the loan and investment securities portfolio were made possible entirely from an increase in deposits of \$34.4 million to \$438.4 million for 1996 from \$404 million for 1995. Most of the increase came in demand deposits which experienced growth of \$12.6 million and savings and time deposits of \$19 million.

Net charge-offs increased in 1996 over 1995 and 1994 to \$1.1 million for 1996 compared to \$385 thousand for 1995 and \$64 thousand for 1994. This increase was due to writing off a considerable number of small dollar volume installment loans. Despite this increase it is still only .28% of the total loan portfolio, and it is felt that these write-offs have helped tremendously in "cleaning up" the loan portfolio, and with a renewed commitment to credit quality during 1996, the loan loss reserve of \$5.5 million or 1.5% of the total loan portfolio is more than adequate to cover possible loan losses.

The Farmers & Merchants State Bank continued to use borrowed funds from the Federal Home Loan Bank of Cincinnati. The Federal Home Loan Bank program allows the bank to protect itself in the event it would offer fixed rate mortgage loans. The loans from the Federal Home Loan Bank reduce the Bank's exposure to interest rate risk as the Bank matches a fixed rate liability with the loan made. The Bank also receives a better servicing margin on these loans than were experienced with loans sold on the secondary market.

CAPITAL RESOURCES

During 1996 stockholders' equity increased by \$3.76 million to \$43.4 million representing a 9.5% increase.

Dividends (which are subject to regulatory restrictions) for 1996 were \$1.495 million on 1,300,000 shares of outstanding common stock.

Under Federal Reserve Board's risk-based guidelines, capital is measured against the Bank's risk-adjusted assets. The Bank's Tier 1 capital (common stockholders' equity less goodwill, if any) to risk-adjusted assets was approximately 8.9% at December 31, 1996, well above the 4% minimum requirement. Total capital to risk-adjusted assets approximated 12.9%, also well above the 8% minimum requirement. The leverage ratio was at 6.45% compared to the 4% requirement. According to FDIC capital guidelines, the Bank is considered to be well capitalized.

These ratios for 1995 were 11.8%, 13.1% and 8.3%, respectively. The decrease is due to a \$10 million dividend which was paid by The Farmers & Merchants State Bank to Farmers & Merchants Bancorp, Inc. on December 31, 1996 with the approval of the FDIC and State of Ohio Division of Financial Institutions. Farmers & Merchants Bancorp then loaned to The Farmers & Merchants State Bank on December 31, 1996 \$10 million in exchange for an unsecured subordinated note receivable. The note is due January 1, 2007. Interest at the rate of 6% is payable annually on the first day of January each year. The purpose for this transaction was to reduce the amount of Ohio Franchise Tax the Bank will have to pay.

ASSET/LIABILITY MANAGEMENT

The primary functions of asset/liability management are to assure adequate liquidity and maintain an appropriate balance between interest earning assets and interest bearing liabilities. It involves the management of the balance sheet mix, maturities, repricing characteristics and pricing components to provide an adequate and stable net interest margin with an acceptable level of risk. Interest rate sensitivity management seeks to avoid fluctuating net interest margins and to enhance consistent growth of net interest income through periods of changing interest rates.

Changes in net income, other than volume related, arise when interest rates on assets reprice in a time frame or interest rate environment that is different from that of the repricing period for liabilities. Changes in net interest income also arise from changes in the mix of interest-earning assets and interest-bearing liabilities.

Historically, The Farmers & Merchants State Bank has maintained liquidity through cash flows generated in the normal course of business, loan repayments, maturing earning assets, the acquisition of new deposits, and borrowings. The Bank's asset and liability management program is designed to maximize net interest income over the long term while taking into consideration both credit and interest rate risk.

Interest rate sensitivity varies with different types of interest-earning assets and interest bearing liabilities. Overnight federal funds on which rates change daily and loans which are tied to the market rate differ considerably from long-term investment securities and fixed rate loans. Similarly, time deposits over \$100,000 and money market certificates are much more interest rate sensitive than passbook savings accounts. The shorter term interest rate sensitivities are the key to measurement of the interest sensitivity gap, or excess interest sensitive earnings assets over interest-bearing liabilities.

The following table summarizes the repricing opportunities as of December 31, 1996 for each major category of interest-earning assets (at amortized cost) and interest-bearing liabilities:

	(Dollars in Thousands)				Total
	0 - 90 Days	90 - 365 Days	1 - 5 Years	Over 5 Years	
Interest bearing deposits	\$0	\$100	\$0	\$0	\$100
Investments	7,041	13,001	62,168	16,207	98,417
Loans	167,786	85,355	91,752	30,255	375,148
Total Rate Sensitive Assets	174,827	98,456	153,920	46,462	473,665
Rate Sensitive Liabilities	225,517	115,660	57,965	4,977	404,119
Gap	\$(50,690)	\$(17,204)	\$95,955	\$41,485	\$69,546

In accordance with FASB guidelines, The Farmers & Merchants State Bank redesignated its remaining Held to Maturity Investment portfolio to Available for Sale in 1996. It is felt that this will provide the Bank with even more liquidity. Management with the assistance of outside advisors is continually looking for opportunities that can minimize market price risk or interest rate risk, and thus improve the quality of the portfolio.

LIQUIDITY

Historically, the primary source of liquidity for the Company has been the increases in core deposits. This is true for 1996 as well. Deposits increased \$34.3 million in 1996 mainly from increased demand deposits of \$12.6 million and increased savings and time deposits of \$19 million. This compares with increases in core deposits of \$59.6 million for 1995 and \$21.9 million for 1994.

The loan to deposit ratio remained virtually unchanged at 84.1% for 1996 and 1995 from a high of 87.5% for 1994.

Short term marketable debt securities has also provided the Company with liquidity. Securities maturing in one year or less amounted to a market value of \$20 million representing 20.4% of total marketable debt securities, a slight drop from prior year levels of \$20.9 million or 25.3% for 1995 and \$25.4 million or 33.4% for 1994.

RESULTS OF OPERATIONS

OVERVIEW

Net income for 1996 was \$5.5 million, a \$200 thousand or 3.8% increase over 1995 net income of \$5.3 million. Net interest margin before the provision for loan losses was \$17.5 million for 1996 compared to \$16.5 million for 1995, a 6.1% increase. The net interest margin percentage was 3.79% for 1996 compared to 4.07% for 1995.

INTEREST INCOME

Interest income and fees on loans increased \$2.8 million to an all time high of \$32.3 million for 1996. This compares with income of \$29.5 million for 1995 and \$32.3 million for 1996. This compares with income of \$29.5 million for 1995 and \$23 million for 1994. This increase is due to an increase in average loans outstanding to \$358 million for 1996 compared to \$324 million for 1995 and \$278 million for 1994.

Interest on investment securities for 1996 was \$5.6 million compared to \$4.1 million for 1995, a \$1.5 million increase. Again most of this increase in income is a result of an increase in volume. The average volume for investment securities was \$96.2 million for 1996 compared to \$72 million for 1995.

INTEREST EXPENSE

Interest expense increased to \$20.9 million for 1996 up \$3.2 million from interest expense of \$17.7 million for 1995. This represents a 17.8% increase. While some of this increase is due to an increase in volume of average outstanding deposits from \$335 million for 1995 to \$376 million for 1996, the majority of the increase is a result in rates being paid on savings accounts and time deposits in order to attract deposits.

Interest expense on borrowed funds declined from just over \$1 million for 1995 to \$962 thousand for 1996 because of the reduction in the amount of outstanding principal.

ALLOWANCE FOR LOAN LOSSES

In extending credit to families, businesses and governments, banks accept a measure of risk against which an allowance or reserve for loan losses is established by way of expense charges to income. The Bank evaluates the adequacy of the allowance for loan losses based on an analysis of specific problem loans, as well as, on an aggregate basis. Factors considered by management in determining the proper reserve include review of general economic conditions, changes in the portfolio mix, past loan-loss experience, the financial condition of the borrowers and reports of examinations furnished by State and Federal banking authorities. Management reviews the calculation of the allowance for loan losses on a quarterly basis, and feels that the allowance is adequate.

The Bank has established the allowance for loan losses to reduce the gross level of loans outstanding by an estimate of uncollectible loans. As loans are deemed uncollectible, they are charged against the allowance. A provision for loan losses is expensed against current income on a monthly basis. This provision serves to replenish the allowance for loan losses to accommodate charge-offs and growth in the loan portfolio, thereby maintaining the allowance at an adequate level.

The provision for loan losses was \$1.07 million compared to \$385 thousand for 1995. Most of this expense came from the installment loan portfolio. Management believes that the installment loan portfolio is now in good shape. This year's allowance for loan losses remains at \$5.5 million, the same level it was for 1995 and 1994.

OTHER OPERATING INCOME

Other operating income increased to almost \$2.4 million, up from \$2.1 million for 1995. Most of this increase, \$264 thousand, was as a result of the adoption of FAS 122 which requires the allocation of the cost of mortgage loans originated with a definitive plan to sell or securitize those loans between the fair value of the loan and the fair value of the servicing rights.

OTHER OPERATING EXPENSES

Despite increased loan and deposit activity, management was able to hold operating expenses to a minimum. Operating expenses of \$10.9 million for 1996 increased only slightly over 1995 expenses of \$10.7 million, a 1.9% increase, compared to a \$1 million increase of 1995 expenses over 1994 levels or a 10.1% increase.

The following table illustrates these increases:

	Dollar Increase (Decrease)		Percentage Increase (Decrease)	
	1996	1995	1996	1995
Salaries	\$ 320	\$ 464	7.07%	11.42%
Employee benefits	\$ 183	\$ 133	18.50%	15.54%
Occupancy expense	\$ 45	\$ 42	9.93%	10.28%
Furniture and equipment	\$ 96	\$ 203	13.87%	41.61%
Other operating expense	\$ (365)	\$ 139	(9.01%)	3.56%

Salary expense increased in 1996 because of increases in compensation to employees based on merit and the general rise in economic conditions, as well as, the increase in the number of employees. Employee benefits also increased for the same reasons as compensation.

Operating supplies and real estate taxes accounted for most of the occupancy expense increase. These increase costs were a natural result of the expansion of the main facilities in Archbold.

As was the case for 1995, the increase in furniture and equipment for 1996 was due to an increase in depreciation expense of just over \$100 thousand. Again this is a direct consequence of the expansion of the main facilities in Archbold.

Most of the other operating expenses remained fairly consistent with 1995 levels. The largest change came in the drop of FDIC assessments from almost \$400 thousand for 1995 to \$2 thousand for 1996. This significant decrease was a result of legislation based on a compromise on the savings and loan crisis.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Report of Independent Accountants

MESSAGE FROM MANAGEMENT:

At the FARMERS & MERCHANTS BANCORP, INC., service is the strength and key to our performance. Fueled by strong loan demand and overhead control, the Bank's directors, management and employees are pleased to report another excellent year in 1996. This resulted in an impressive 13.21 percent Return on Average Equity and 1.14 percent Return on Average Assets. With a new high in assets of \$501,449,000, capital accounts have increased to \$43,381,000 with net income of \$5,483,000 or \$4.22 per share compared to \$4.07 in 1995 (adjusted for stock split in June of 1996).

The Farmers & Merchants Bancorp, Inc. continues to be responsive in listening to and flexible in working with its customers, while at the same time maintaining sound credit judgment. The Bank's loan portfolio represents a solid foundation upon which the Bank's safety, soundness and profitability are built. This foundation results from two basics: a philosophy of being conservative, yet responsive and a lending premise that emphasizes quality not quantity. The Farmers & Merchants Bancorp, Inc. provides its customers with easy, accessible services to help them achieve their financial goals. The Bank's continued responsiveness promotes the trust and respect that forms the basis for a solid banking relationship in which our customers needs are met.

While the above results are gratifying, we enter 1997 and beyond with a sense of urgency. The banking industry is changing rapidly, as evidenced by the many bank mergers and acquisitions announced during the year. Our competitors, both bank and non-bank, are becoming larger and more sophisticated. Many traditional banking services have become commodities, necessitating a low cost structure for providers of such services. Geographic boundaries continue to lose relevance as technology makes many physical facilities obsolete. To be successful in this changing environment, Farmers & Merchants Bancorp, Inc. must continue to evolve to a more marketing-oriented financial services organization. First and foremost, our focus must be on the customer. Our products and services must be designed for and centered around the customer's needs - a challenge that every financial institution faces.

Among the events of 1996, the completion of the Delta Office expansion is the most noteworthy. The renovations were completed in time for our Annual Open House, the first weekend in November. Much credit must be given to the Delta Staff for keeping the office operating efficiently during the time of construction. We placed Automated Teller Machines (ATM's) in the Fulton County Health Center, Community Hospital of Williams County and the Delta Office to better serve our customers from the four county area. An Asset Recovery Department was created to handle the collection work for the bank's eleven (11) offices. This department is located at the Main Office and has already proven to be a much needed addition.

In 1997, the Farmers & Merchants Bancorp, Inc. will be celebrating its "100th Anniversary" with several planned events held throughout the year. We will keep you informed as to when they will be held and hopefully you will be able to attend.

The word "relationship" may have a slightly old-fashioned sound to it, but our relationships must be as modern as technology can make them. While a brick-and-mortar branch network remains the primary customer connection at present, we are committed to meeting our customers' banking needs anytime and anywhere. Be it over the telephone, via computer, through ATMs or in a form not yet seen, we see technology as a tool that will help enhance, not replace, existing service. In our vision, tradition and tomorrow can co-exist.

In closing, we remain committed to building on traditions with innovation and positive results. The ideals and spirit that have served as the foundation of our organization for the past century will continue to guide us to remain one of the finest community banks in Ohio. We believe these efforts will provide shareholder rewards that are consistent with acceptable levels of return on investment.

We would like to express our appreciation for the input and support of our Board of Directors, Advisory Boards, Loyal employees and customers, and the cooperation of the communities we serve, and finally the continued confidence of our shareholders.

We look forward to the opportunities and challenges of 1997.

INDEPENDENT AUDITORS' REPORT

We have audited the consolidated balance sheets of Farmers & Merchants Bancorp, Inc., Archbold, Ohio, and subsidiaries as of December 31, 1996 and 1995, and the related consolidated statements of income, changes in shareholders' equity, and cash flows for the years ended December 31, 1996, 1995 and 1994. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. These standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Farmers & Merchants Bancorp, Inc. and subsidiaries, as of December 31, 1996 and 1995, and the results of its consolidated operations and cash flows for the years ended December 31, 1996, 1995 and 1994 in conformity with generally accepted accounting principles.

FARMERS & MERCHANTS BANCORP, INC.

Notes to Consolidated Financial Statements

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING AND REPORTING POLICIES

CONSOLIDATION POLICY:

The consolidated financial statements include the accounts of Farmers & Merchants Bancorp, Inc. and its wholly-owned subsidiaries, The Farmers & Merchants State Bank, (the Bank), a commercial banking institution, and The Farmers & Merchants Life Insurance Company, a life and accident and health insurance company.

NATURE OF ACTIVITIES:

The consolidated income of Farmers & Merchants Bancorp, Inc. is principally from income of the bank subsidiary, The Farmers & Merchants State Bank. The subsidiary Bank grants agri-business, commercial, consumer and residential loans to customers primarily in northwest, Ohio.

ESTIMATES:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

CASH EQUIVALENTS:

For purposes of the statement of cash flows, the company considers all highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents. This includes cash on hand, amounts due from banks, and federal funds sold. Generally, federal funds are purchased and sold for one-day periods.

INVESTMENT SECURITIES:

Securities, when purchased, are designated as Investment Securities Available for Sale and are carried at market value. They remain in that category until they are sold or mature. The specific identification method is used in determining the cost of securities sold.

FARMERS & MERCHANTS BANCORP, INC.

Notes to Consolidated Financial Statements (Continued)

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING AND REPORTING POLICIES
(Continued)

INVESTMENT SECURITIES: (Continued)

Unrealized holding gains and losses, net of tax, on securities classified as Available for Sale are reported as a net amount as a separate component of shareholders' equity until realized.

In accordance with a provision provided by the Financial Accounting Standards Board. The Farmers & Merchants State Bank elected to reclassify any investment securities classified as Held to Maturity to Available for Sale during 1995. The effect of this reclassification was to increase the net unrealized gain on securities Available for Sale by \$561,746 net of a tax effect of \$289,385.

LOANS:

Loans are stated at the amount of unpaid principal, reduced by unearned discounts and deferred loan fees and costs, as well as, by the allowance for loan losses. Interest is accrued on all loans not discounted by applying the interest rate to the amount outstanding. When it is not reasonable to expect that interest will be realized, accrual of income ceases and these loans are placed on a "cash basis" for purposes of income recognition.

LOAN ORIGINATION FEES AND COSTS:

The Bank has adopted the Financial Accounting Standards Board's Statement of Financial Accounting Standard No. 91, which establishes financial accounting and reporting guidelines for accounting for nonrefundable fees and costs associated with originating or acquiring loans. Statement No. 91 requires that nonrefundable loan fees, such as the fees more commonly known as "points" or "origination fees" but not necessarily limited thereto, be deferred and recognized over the life of the loan as an adjustment of yield. Likewise, certain direct loan origination costs are to be deferred and recognized as a reduction in the yield of the loan.

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING AND REPORTING POLICIES
(Continued)

MORTGAGE SERVICING RIGHTS:

The Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 122 "Accounting for Mortgage Servicing Rights an amendment of FASB Statement No. 65." FAS 122 states that "a mortgage banking enterprise that purchases or originates mortgage loans with a definitive plan to sell or securitize those loans and retain the mortgage servicing rights shall allocate the cost of the mortgage loans based on the relative fair values at the date of purchase or origination." The Bank adopted FAS 122 effective January 1, 1996.

IMPAIRED LOANS:

The Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 114, "Accounting by Creditors for Impairment of a Loan." FAS 114 states that "a loan is impaired when, based on current information and events, it is probable that a creditor will be unable to collect all amounts due according to the contractual terms of the loan agreement." When it is determined by the creditor that a loan is impaired, "the creditor shall measure the impairment based on 1) the present value of expected future cash flows discounted at the loan's effective rate, 2) the loan's observable market price, or 3) the fair value of the collateral if the loan is collateral dependent." FAS 114 was adopted by the Bank effective January 1, 1995.

ALLOWANCE FOR LOAN LOSSES:

The allowance for loan losses is available for future charge-offs. It is increased by provisions charged to operations and decreased by charge-offs net of recoveries. The provision is primarily the result of management's continuous review and evaluation of problem loans, supplemented by historical net charge-off experience, economic conditions and the size of the loan portfolio. The allowance is maintained at a level which management believes to be adequate to provide for potential losses. For tax purposes, the Bank follows a policy of providing additions to the allowance for possible loan losses in accordance with maximum amounts under applicable federal tax laws.

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING AND REPORTING POLICIES
(Continued)

BANKING PREMISES AND EQUIPMENT:

Banking premises and equipment are stated at cost less accumulated depreciation. Depreciation is based on the estimated useful lives of the various properties and is computed using accelerated methods. Costs for maintenance and repairs are charged to operations as incurred.

PREMIUM RESERVES AND BENEFIT LIABILITIES

Liabilities for unreported claims are calculated from runoff experience. Liabilities for future reserves are based on the 1964 CDT at 3%.

Premium reserves for life insurance contracts are determined using the 1958 CET 3.5% net level reserve method. Premium reserves for the accident and health policies are determined by the mean Prorata and rule of 78's.

FAIR VALUE OF FINANCIAL INSTRUMENTS:

FASB Statement No. 107, Disclosures about Fair Value of Financial Instruments, requires disclosure of the fair value information about financial instruments, both assets and liabilities, whether or not recognized in the balance sheet, for which it is practicable to estimate that value. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by assumptions used, including the discount rate and estimates of cash flows. In that regard, the derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, could not be realized in immediate settlement of the instrument. FASB Statement No. 107 excludes certain financial instruments and all nonfinancial instruments from its disclosure requirements. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of the Company.

FEDERAL INCOME TAX:

The provision for federal income taxes is based on reported income and expense, adjusted for permanent differences between reported income and taxable income. The deferred portion of the provision relates to those items of income and expense in the financial statements that are recognized in different time periods for income tax purposes.

NOTE 4. LOANS (Continued)

Senior officers and directors and their affiliated companies were indebted to the Bank in the aggregate of \$12.4 million and \$11.9 million at December 31, 1996 and 1995, respectively. All such loans were made on substantially the same terms and conditions, including interest rates and collateral, as those prevailing at the time for comparable loan transactions with other persons. Loans made during 1996 were \$19 million and repayments were \$18.5 million. In the opinion of management, these loans do not involve more than normal risk of collectibility or possess other unfavorable features.

The following schedule details past due and nonaccrual loans:

(In thousands)	Past Due	Past Due	Nonaccrual
	30 to 89 Days Still Accruing	90 Days or More Still Accruing	
-----	-----	-----	-----
Real estate	\$3,470	\$919	\$1,474
Commercial and industrial	1,996	269	1,429
Agricultural (excluding real estate)	190	107	432
Consumer and other loans	2,181	604	154

NOTE 5. ALLOWANCE FOR POSSIBLE LOAN LOSSES

An analysis of the allowance for loan losses is as follows:

(In thousands)	1996	1995	1994
-----	-----	-----	-----
Balance at beginning of year	\$5,500	\$5,500	\$5,000
Provision charges to operating expenses	1,068	385	564
Loans charged-off	(1,711)	(1,479)	(1,171)
Recoveries	643	1,094	1,107
-----	-----	-----	-----
Balance at End of Year	\$5,500	\$5,500	\$5,500
	=====	=====	=====

At December 31, 1996 and 1995, the recorded investment in loans considered impaired was \$3.489 million and \$3.494 million, respectively. Of the \$3.489 million and \$3.494 million for 1996 and 1995, respectively that were considered impaired, \$1.8 million and \$1.5 million, respectively required the establishment of an allocated reserve.

Average investment in impaired loans for 1996 was \$3.492 million and \$3.088 million for 1995. The Bank stops accruing interest income when a loan is deemed to be impaired, and recognizes interest income when the interest income is actually received. Interest income recognized on impaired loans during 1996 and 1995 was \$1.422 million and \$2.275 million, respectively.

The allowance for loan losses for federal income tax purposes was \$843 thousand for 1996 and 1995 and \$636 thousand for 1994.

NOTE 10. FEDERAL INCOME TAXES (Continued)

During 1994 the Bank was examined by the Internal Revenue Service for the tax years ended December 31, 1991 and 1992. This examination resulted in combined additional assessments of \$18 thousand. The Bank also received \$182 thousand in refunds during the tax year ended December 31, 1994 as a result of amending the 1991 and 1992 tax returns for reclassification of municipal securities.

NOTE 11. RETIREMENT INCOME PLAN

The Bank maintained a trustee noncontributory defined benefit retirement income plan covering all employees who have attained the age of 21 and completed six months of service on a full-time basis. Application for termination and dissolution of the plan was made in 1995. In 1996 approval was granted, and the defined benefit retirement plan was terminated. All of the assets were transferred to a 401(k) profit sharing plan established in 1995.

The defined benefit retirement plan called for benefits to be paid to eligible employees at normal retirement age at a monthly benefit equal to 60% of average monthly compensation less 50% of the monthly Primary Social Security Amount, reduced prorata for service less than 30 years. In no event would the monthly benefit be less than the benefit accrued as of July 31, 1983. Benefits were also available for early retirement at age 60 with 15 years of service 1) payable at age 65 equal to the accrued normal retirement pension using years of service and average monthly compensation at the time of early retirement and assuming the employee received no further compensation after retirement to calculate the Primary Social Security Amount; or 2) an immediate pension equal to one above but reduced 5/9% for each month prior to age 65 that the pension commences. The plan also had provisions for termination benefits and pre-retirement death benefits.

The normal form of benefit payment was a 50% Joint and Survivor form if the participant was married, and a life with a minimum of 120 monthly payments guaranteed annuity otherwise.

Plan assets consisted of common stock, investment grade corporate bonds, U.S. Government obligations, and a cash management account consisting primarily of U.S. Treasury obligations.

NOTE 11. RETIREMENT INCOME PLAN (Continued)

As was mentioned above, the Bank has terminated the defined benefit retirement plan, and has replaced it with a 401(k) profit sharing plan. All assets of the defined benefit plan were transferred to the 401(k) profit sharing plan during 1996. The assets transferred which were in excess of future benefit obligations were allocated to participants by increasing accrued pension benefits before plan termination.

The 401(k) profit sharing plan allows eligible employees to save at a minimum one percent of eligible compensation on a pre-tax basis, subject to certain Internal Revenue Service limitations. The Bank will match 50% of employee 401(k) contributions up to four percent of total eligible compensation. In addition the Bank may make a discretionary contribution from time to time as is deemed advisable. A participant is 100% vested in the participant's deferral contributions and employer matching contributions. A seven year vesting schedule applies to employer discretionary contributions.

In order to be eligible to participate, the employee must be 21 years of age, completed six months of service, work 1,000 hours in the plan year and be employed on the last day of the year. Entry dates have been established at January 1 and July 1 of each year.

The plan calls for only lump-sum distributions upon either termination of employment, retirement, death or disability.

Pension expense for the 401(k) profit sharing plan for both the employer matching contribution and the discretionary contribution was \$267 thousand and \$225 thousand for 1996 and 1995, respectively.

NOTE 12. COMMITMENTS AND CONTINGENT LIABILITIES

The Bank's financial statements do not reflect various commitments and contingent liabilities which arise in the normal course of business and which involve elements of credit risk, interest rate risk and liquidity risk. These commitments and contingent liabilities are commitments to extend credit, credit card arrangements and standby letters of credit. A summary of the Bank's commitments and contingent liabilities at December 31, 1996 is as follows:

(In thousands)	Notational Amount
-----	-----
Commitments to extend credit	\$ 49,480
Credit card arrangements	\$ 7,726
Standby letters of credit	\$ 2,245

FARMERS & MERCHANTS BANCORP, INC.

Notes to Consolidated Financial Statements (Continued)

NOTE 12. COMMITMENTS AND CONTINGENT LIABILITIES (Continued)

The Bank's policy was to charge benefit funding and costs of administration of the plan to operations. Charges to operations were \$38 thousand for 1995 and \$156 thousand for 1994.

Commitments to extend credit, credit card arrangements and standby letters of credit all include exposure to some credit loss in the event of nonperformance of the customer. The Bank's credit policies and procedures for credit commitments and financial guarantees are the same as those for extensions of credit that are recorded in the financial statements. Because these instruments have fixed maturity dates, and because many of them expire without being drawn upon, they generally do not present any significant liquidity risk to the Bank.

In the ordinary course of business, the company at times, is subject to pending and threatened legal actions and proceedings. It is the opinion of management that the outcome of any such matters and proceedings would not have a material effect on the financial position of the company. Management has no knowledge of any pending or threatened litigation.

NOTE 13. CONCENTRATIONS OF CREDIT

All of the Bank's loans, commitments, and standby letters of credit have been granted to customers in the Bank's market area of northwest Ohio. All such customers are depositors of the Bank. Also, investments in state and municipal securities may involve governmental entities within the Bank's market area. The concentrations of credit by type of loan are set forth in Note 4. Standby letters of credit were granted primarily to commercial borrowers.

As of December 31, 1996, the company had on deposit with financial institutions \$230 thousand in excess of FDIC insurable limits.

NOTE 14. REGULATORY CAPITAL REQUIREMENTS

Federal regulatory agencies have adopted various capital standards for financial institutions, including risk-based capital standards. The primary objectives of the risk-based capital framework are to provide a more consistent system for comparing capital positions of financial institutions and to take into account the different risks among financial institutions' assets and off-balance sheet items.

Risk-based capital standards have been supplemented with requirements for a minimum Tier 1 capital to assets ratio (leverage ratio). In addition, regulatory agencies consider the published capital levels as minimum levels and may require a financial institution to maintain capital at higher levels.

FARMERS & MERCHANTS BANCORP, INC.

Notes to Consolidated Financial Statements (Continued)

NOTE 14. REGULATORY CAPITAL REQUIREMENTS

A comparison of the Bank's capital as of December 31, 1996 with the minimum requirement is presented below:

(In thousands)	Actual	Requirements
-----	-----	-----
Tier 1 Risk-based Capital	8.90%	4.00%
Total Risk-based Capital	12.94%	8.00%
Leverage Ratio	6.45%	4.00%

According to regulatory guidelines, the Bank is considered to be "well capitalized".

The Bank is restricted as to the amount of dividends which can be paid. Dividends declared by the Bank that exceed the net income for the current year plus retained income for the preceding two years must be approved by federal and state regulatory agencies. Under this formula dividends of \$1 million may be paid without prior regulatory approval. Regardless of formal regulatory restrictions, the Bank may not pay dividends that would result in its capital levels being reduced below the minimum requirements shown above.

On December 31, 1996 the Bank declared and paid a \$10 million dividend to the Bank's parent company, Farmers & Merchants Bancorp, Inc. with approval from the FDIC and the State of Ohio Division of Financial Institutions. On December 31, 1996 Farmers & Merchants Bancorp, Inc. loaned to The Farmers & Merchants State Bank \$10 million in exchange for an unsecured subordinated note receivable. The note is due January 1, 2007. Interest at the rate of 6% is payable annually on the first day of January each year. The Bank has the option of prepaying all or any part of the note at any time without notice or penalty, subject to the approval of the FDIC and the State of Ohio Division of Financial Institutions.

Standby letters of credit	\$ 2,245	\$ 2,245	\$ 1,630	\$ 1,630

The following assumptions and methods were used in estimating the fair value for financial instruments:

CASH AND SHORT-TERM INVESTMENTS:

For cash on hand and in banks, as well as, federal funds sold, the carrying amount is a reasonable estimate of fair value.

INVESTMENT SECURITIES:

Fair value is based on quoted market prices or dealer quotes. See Note 3, Investment Securities, for additional information.

FARMERS & MERCHANTS BANCORP, INC.

Notes to Consolidated Financial Statements (Continued)

NOTE 16. FAIR VALUE OF FINANCIAL INSTRUMENTS (Continued)

LOANS:

The estimated fair value of the Loan portfolio is based on expected future cash flows discounted by an appropriate rate derived in part from the Treasury yield curve.

DEPOSITS:

The fair value of demand deposits, savings accounts, and certain money market deposits is the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposits is estimated using anticipated future cash flows discounted by an appropriate rate derived in part from the Treasury yield curve.

BORROWINGS:

Short-term borrowings are carried at cost which approximates fair value. Other long-term debt was generally valued using a discounted cash flows analysis with a discounted rate based on current incremental borrowing rates for similar types of arrangements, or if not available, based on an approach similar to that used for loans and deposits. Long-term borrowings include their related current maturities.

OFF-BALANCE SHEET FINANCIAL INSTRUMENTS:

The fair value of commitments is estimated using the fees currently charged to enter into similar agreements, taking into account remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value of guarantees and letters of credit is based on fees currently charged for similar agreements or on the estimated cost to terminate them or otherwise settle the obligations with the counterparties at the reporting date.

NOTE 17. CHANGE IN ACCOUNTING METHOD

In May 1993, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 115, "Accounting for Certain Investments in Debt and Equity Securities", (FAS 115). FAS 115 requires, among other things, that securities classified as "Available for Sale" be carried at fair value. Adjustments required to reflect fair value and the related income tax effects are excluded from earnings and reported separately as a component of shareholders' equity. This standard was adopted for the Bank's first year beginning after December 15, 1993 as required. The cumulative effect of the change as of the date of adoption, January 1, 1994, was to increase shareholders' equity (net of income taxes) by \$289 thousand.

INDEPENDENT AUDITORS' REPORT ON
SUPPLEMENTARY INFORMATION

Our report on our audits of the basic financial statements of Farmers & Merchants Bancorp, Inc., Archbold, Ohio, and its wholly-owned subsidiaries, The Farmers & Merchants State Bank, and Farmers & Merchants Life Insurance Company for the years ended December 31, 1996 and 1995, appears on page 1. The examination was made for the purpose of forming an opinion on the basic financial statements taken as a whole. The summary of operations is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

SELECTED FINANCIAL DATA BY MANAGEMENT

FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The Farmers & Merchants Bancorp, Inc. reported consolidated earnings of \$5.483 million for 1996 representing an increase of \$186 thousand over the \$5.297 million for 1995, a 3.5% increase. This increase was primarily the result of an increase in interest from loans with a corresponding increase in the interest costs associated with deposits, the net effect of which was an increase in net interest income.

Consolidated assets grew by \$37.5 million in 1996 to a record \$501.5 million from consolidated assets of \$464 million for 1995. This represents an 8% increase. As was the case for 1995's increase, the increase for 1996 was due almost entirely to an increase in lending activity. While loans demonstrated a healthy yet controlled growth pattern, management is still of the opinion that a loan loss reserve of \$5.5 million is adequate to cover potential loan losses.

The return on average assets and average shareholders' equity for 1996 was 1.14% and 13.21%, respectively. These returns compare to 1.23% average return on assets and 13.93% average return on shareholders' equity for 1995.

LIQUIDITY

Maintaining sufficient funds to meet depositor and borrower needs on a daily basis are among management's top priorities. This is accomplished by investing in assets such as U.S. Government, U.S. Agency, Municipal, and Corporate investment securities and Commercial Paper which can be converted to cash in a timely manner, as well as maintaining appropriate levels of cash. The average aggregate balance of these assets was \$94.5 million for 1996 representing 19.58% of total average assets. As was stated above, the Bank reclassified in 1995 its remaining Held to Maturity security portfolio to Available for Sale to enhance the Bank's liquidity position.

CAPITAL RESOURCES

Shareholders' equity was \$43.4 million at December 31, 1996 compared to \$39.6 million for 1995. The company continues to have a strong capital base and its bank subsidiary The Farmers & Merchants State Bank continues to maintain regulatory capital ratios that are significantly above the defined regulatory capital ratios.

At December 31, 1996, The Farmers & Merchants State Bank had a total risk-based capital ratio of 12.94% and a 8.90% core capital to risk-based asset ratio. Selected capital ratios must also be maintained. The Bank's leverage ratio of 6.45% is substantially in excess of the minimum 4% guideline. All of these ratios have declined when compared to the prior year's ratios of 13.06%, 11.81% and 8.28%, respectively. This is due entirely from the \$10 million dollar dividend paid by The Farmers & Merchants State Bank to Farmers & Merchants Bancorp, Inc. the parent company. This dividend with the subsequent loan of \$10 million to The Farmers & Merchants State Bank by Farmers & Merchants Bancorp, Inc. was done to save state franchise taxes.

SELECTED FINANCIAL DATA BY MANAGEMENT (Continued)

The Company's subsidiaries are restricted by regulations from making dividend distributions in excess of certain prescribed amounts.

During 1993 and 1994, the Financial Accounting Standards Board issued numerous standards which affect the accounting and reporting of investment securities for 1994, and impaired loans for 1995. In 1995 it also issued standards which will affect how mortgage servicing rights will be treated. The impact of these pronouncements on the Consolidated Financial Statements are discussed in the Notes to the Consolidated Financial Statements.
